

IN THE CLAIMS:

The text of all pending claims, (including withdrawn claims) is set forth below. Cancelled and not entered claims are indicated with claim number and status only. The claims as listed below show added text with underlining and deleted text with ~~strikethrough~~. The status of each claim is indicated with one of (original), (currently amended), (cancelled), (withdrawn), (new), (previously presented), or (not entered).

Please CANCEL claims 5-14 in accordance with the following:

1. (CURRENTLY AMENDED) ~~A Tear~~tear-off device for sections of a continuous material, comprising:

a pullout mechanism ~~for the~~to transport of the continuous material; and

a tear-off mechanism, ~~which has~~having at least two pressure-applying elements comprising eccentric rollers and, ~~which are~~ disposed on opposite sides of the continuous material, and a positioning device ~~for~~ engaging at least one of said pressure-applying elements against the continuous material, the engagable pressure-applying elements ~~being constructed as eccentric rollers and~~ being adapted to be driven by a selected one of: individually and jointly.

2. (PREVIOUSLY PRESENTED) The tear-off device of claim 1, wherein the engagable pressure-applying elements have internal eccentrics, which are adapted to be rotated and on which the pressure-applying rollers are mounted rotatably.

3. (PREVIOUSLY PRESENTED) The tear-off device of claim 1, wherein the engagable, pressure-applying elements have cams, which are adapted to be engaged against the continuous material.

4. (PREVIOUSLY PRESENTED) The tear-off device of claim 3, wherein, the cams have the shape of roller segments.

5. (CANCELLED)
